EN8 Black Hexagons â?? 20mm to 80mm â?? Tough & Machinable Carbon Steel Bars

Ð?Ð¿Ð¸Ñ•Ð°Ð½Ð¸Ðµ

EN8 (BS970:1955) is a **medium carbon steel** with good tensile strength and machinability, making it highly popular for general engineering applications. In **black hexagon form**, it offers strength and form factor ideal for **wrench flats, bolt heads, spanners, shafts**, and more.

Steelmet Industries supplies **EN8 Black Hexagon bars** in the size range of **20mm to 80mm A/F**, with excellent control over dimensions, surface finish, and chemistryâ??ideal for machining and mechanical use.

Key Features of EN8 Black Hexagons

- **Standard:** BS970:1955

- **Grade:** EN8

- **Form:** Hot Rolled Black Hexagons

- **Size Range:** 20mm to 80mm A/F (Across Flats)

- **Condition:** As Rolled / Normalized / Annealed

- **Tensile Strength (UTS):** 550â??650 MPa (typically)

- **Yield Strength:** 280â??360 MPa

- **Elongation:** ~16â??20%

- **Hardness:** 160â??220 BHN (approx.)

- **Machinability:** Good

- **Weldability:** Fair â?? Preheating recommended

- **Heat Treatment:** Hardenable by quenching and tempering

Typical Applications of EN8 Hexagon Bars

- Manufacturing of **spanners, wrenches, bolts, and fasteners**

- **Drive shafts, machine keys, and axles**

- **Jigs, fixtures, tool holders, and connecting rods**

- **Engine parts**, hubs, bushings, and gears

- Construction and heavy-duty engineering components

- Suitable for further heat treatment if higher strength is needed

Alternate Supply Options & Related Products

Steelmet Industries can also supply:

- **EN8 Rounds, Squares, and Flats**

Steelmet Industries | 8 Bhagwagar Bhawan, CA Road, Nagpur 440018, MH INDIA

- **Cold Drawn Bright Bars in EN8**

- **EN8D for higher purity and impact resistance**

- **Hexagons in EN1A, EN9, EN19, C45, and SAE1045 grades**

- Cut-to-length supply based on customer requirements

- Heat treated or normalized bars available on request

Why EN8 Hexagons from Steelmet Industries?

- ð??• **Size Range:** 20mm to 80mm A/F â?? with tight tolerances

- â??ï¸• **Cut-to-length or long bar supply**

- 🔧 ﹒ **Custom machining and prep options possible**

- 📦 **Bundled packaging and identification tags**

- ⏱﹒ **Timely, scheduled deliveries across India & exports**

- 📋 **Third-party inspections, MTCs, test reports available**

- 🌐 **Export-capable with multilingual documentation**

See our commitment to [Quality](#).

Frequently Asked Questions — EN8 Black Hexagon Bars

Q1: What are EN8 black hexagons used for?

A: EN8 hexagons are used for spanners, bolts, shafts, mechanical linkages, and fasteners that require medium strength and machinability.

Q2: Can EN8 hexagons be heat treated?

A: Yes. EN8 is hardenable by oil quenching and tempering. It can be normalized or annealed before further processing.

Q3: Are bright EN8 hexagons better than black ones?

A: Bright bars have tighter tolerances and better surface finish, but black hexagons are more cost-effective for heavy-duty and hot-machined parts.

Q4: Is EN8 weldable?

A: Yes, with preheating. Its medium carbon content requires proper procedures to avoid cracking.

Q5: Do you supply specific cut lengths or custom sizes?

A: Yes. Steelmet can supply custom cut lengths and sizes with advance notice and mutual agreement.
