# ð??§ Brought to you by Steelmet Industries â?? www.steelmet.in

If youâ??re a **welder or fabricator** making window grills, gates, or railings â?? or a **homeowner** wanting strong, rust-free grills that last â?? **MS Bright Bars** are a better choice than ordinary MS Black Bars.

At Steelmet Industries, we make and supply MS Bright Flats, Squares, Rounds, and custom profiles that are perfect for fabrication work.

Hereâ??s why more and more fabricators are switching to **Steelmet Bright Bars**:

# ð??• 1. No Need for Grinding Before Painting

MS Bright Bars have a clean, smooth finish. Black bars have a rough, flaky surface (due to scale).

- â? Bright bars are ready to paint â?? no cleaning or grinding needed.
- â? Saves labour, time, and electricity.

# ð??• 2. Exact Sizes = Better Welding and Fit

Our bright bars are made with tight tolerances.

That means they are **straight**, **accurate**, and **uniform**.

- â? No gaps when welding.
- â? Easier fabrication, better-looking results.

# ð?§° 3. Less Wear on Cutting & Welding Tools

Black bars can be harder on your blades, grinders, and welding tips.

Bright bars are smoother and more consistent, so theya??re kinder on your tools.

- â? Your tools last longer.
- â? Fewer stoppages.
- â? Less money spent on replacements.

# ð?§± 4. Cleaner Welding, Stronger Joints

Because of the uniform chemical composition and better surface finish, welding is easier and cleaner with bright bars.

- â? No porosity or blowholes
- â? Strong, long-lasting weld joints

# This means they donâ??t twist or bend after cutting or welding. 2 Saves rework 1 Tatas perfectly aligned

# **ð??**¦ 6. Rust-Resistant Before Painting

The flaky outer layer of black bars **holds moisture**, which leads to **early rusting**.

Bright bars, being smooth and rust-free when supplied, stay cleaner until painted.

- â? Better life
- â? Fewer rust complaints from customers

# ð?§¾ 7. More Metal, Less Waste

Black bars often have thinner edges or irregular thickness â?? you lose material while finishing. Steelmet Bright Bars are true to size and full weight.

- â? You get what you pay for
- â? More value in every piece

### ð?• For Homeowners:

When youâ??re getting window grills or gates made:

- â? Ask your fabricator to use Steelmet MS Bright Bars
- â? Get neater looks, longer life, and less rust
- â? Peace of mind and less maintenance in future

### ð?§?â?•ð?• For Fabricators:

When you use Steelmet Bright Bars, youâ??ll:

â?? Work faster and cleaner

â?? Save on tools and labour

a?? Deliver better-looking jobs

â?? Win more trust and repeat customers

# ð??¼ Why Choose Steelmet Industries?

ð??¹ 40+ years of experience in steel bars ð??¹ Sizes from 8mm to 100mm and above ð??¹ Custom shapes and lengths available ð??¹ Always in stock â?? fast dispatch ð??¹ Quality, consistency, and service you can rely on

Let us help you select the right size and type for your needs.
