SAE1006 Wire Rod Coils â?? Dia 5.5mm to 12mm â?? Excellent Cold Forming Steel

Ð?Ð¿Ð¸Ñ•Ð°Ð½Ð¸Ðµ

SAE1006 is a **low-carbon steel grade** known for its excellent **cold formability, weldability, and surface finish**. It is especially suitable for **cold drawing**, **forming**, and **welding applications** where superior ductility and low strength are desired.

At **Steelmet Industries**, we supply **SAE1006 wire rod coils** in the size range of **5.5mm to 12mm diameter**, with close control over **chemistry**, **surface quality**, and **coil parameters**. These are ideal for downstream processes like wire drawing, annealing, galvanizing, and fastener manufacturing.

Key Characteristics of SAE1006 Wire Rod Coils

- **Standard:** SAE J403
- **Grade:** SAE1006
- **Form:** Wire Rod Coil
- **Size Range:** 5.5mm to 12mm
- **Coil Weight:** 1.8 to 2.2 MT (typical)
- **Surface Condition:** As Rolled / Pickled / Descaled

- **Carbon Content:** ~0.03â??0.08%
- **Tensile Strength:** Low, suited for cold deformation
- **Cold Workability:** Excellent
- **Weldability:** Excellent
- **Machinability:** Fair, best when annealed

Applications of SAE1006 Wire Rods

SAE1006 wire rods are widely used in:

- **Cold drawn wires for general applications**
- **Galvanized wire, binding wire, and fencing wire**
- **Nails, screws, rivets, and hardware items**
- **Wire ropes, chains, and mesh**
- **Wire for furniture and storage racks**
- **Welding wire and rod manufacturing**
- **Low-carbon seamless tubing (after further processing)**

Alternatives and Related Wire Rod Grades

Steelmet Industries also supplies:

- **SAE1008 / SAE1010 Wire Rods** â?? for higher strength

- **C10 / S10C / C15 Wire Rods** â?? for slightly higher carbon content
- **Cold drawn and annealed wires** in coils or cut lengths
- **Custom coil weight packaging** available upon request

Why Choose Steelmet Industries?

- ð??¯ **Precise size range from 5.5mm to 12mm**
- ð?§¾ **Full traceability with test certificates, if required**
- ð??¦ **Custom coil weights and special packaging**
- â•±ï¸• **Timely dispatches for scheduled deliveries**
- ð??• **Serving customers in India and worldwide**
- ð?? ï¸• **Capability to meet bulk and regular orders with consistency**
- ð??? **Third-party inspections, lab reports, endorsed MTCs available on request**

Read our Quality Policy to know how we maintain consistency.

Frequently Asked Questions â?? SAE1006 Wire Rod Coils

Q1: What is SAE1006 wire rod used for?

A: Itâ??s used in cold drawing, forming operations, and production of galvanized wires, nails, fencing wires, and welding rods.

Q2: Is SAE1006 suitable for welding consumables?

A: Yes, itâ??s ideal for MIG wire and core wire used in welding electrodes due to its low carbon content and cleanliness.

Q3: Can I get these in specific coil weights?

A: Yes. Steelmet can supply coils as per customerâ??s handling limitations or packing preferences.

Q4: Do you supply test certificates?

A: Yes, we provide MTCs and third-party endorsed documents upon request and agreement.

Q5: Are 1006 and 1008 interchangeable?

A: No. SAE1008 has higher carbon content and is used when slightly higher strength is required. SAE1006 is softer and better for deep drawing.
